## Sport & Spine Rehab Clinical Research Foundation

The Sport & Spine Rehab Clinical Research Foundation is a non-profit research organization created by the founders of Sport & Spine Rehab. They would like to invite you to provide permission to include de-identified information about your condition in a larger research database. It is important you read and understand the information below before you agree to be a participant. Your relationship with Sport & Spine Rehab will not change if you decline.

Part of Sport & Spine Rehab and the Sport & Spine Rehab Clinical Research Foundation's goal is to ensure our doctors are providing the best treatments and maximizing clinical outcomes. Clinical outcomes are pain, disability, and quality of life measures. This information is collected in the form of a questionnaire at the start and end of your therapy.

The Foundation would like permission to include your information in a study database. The purpose of this database is to track the outcome measures results of Sport & Spine Rehab's treatment program, FUNHAB®. Your records will be assigned a random number instead of using your name. This allows all information to be kept private. Only members of the research team will have access to the password protected database.

Please ask questions about what you do not understand before agreeing to take part, as this is voluntary. You may withdraw and stop participating at any time without affecting your care. If at any time you wish to withdraw your consent please let any member of the research or clinic staff know.

Statement of Consent: I have read the information above. I have had the chance to ask questions and have them answered. I agree to allow my information to be added to an outcome measures database.
